1. Homepage Loading Test

Test Case ID: TC_HOMEPAGE_001

Description: Verify that the homepage loads correctly with all elements visible and functional.

Steps:

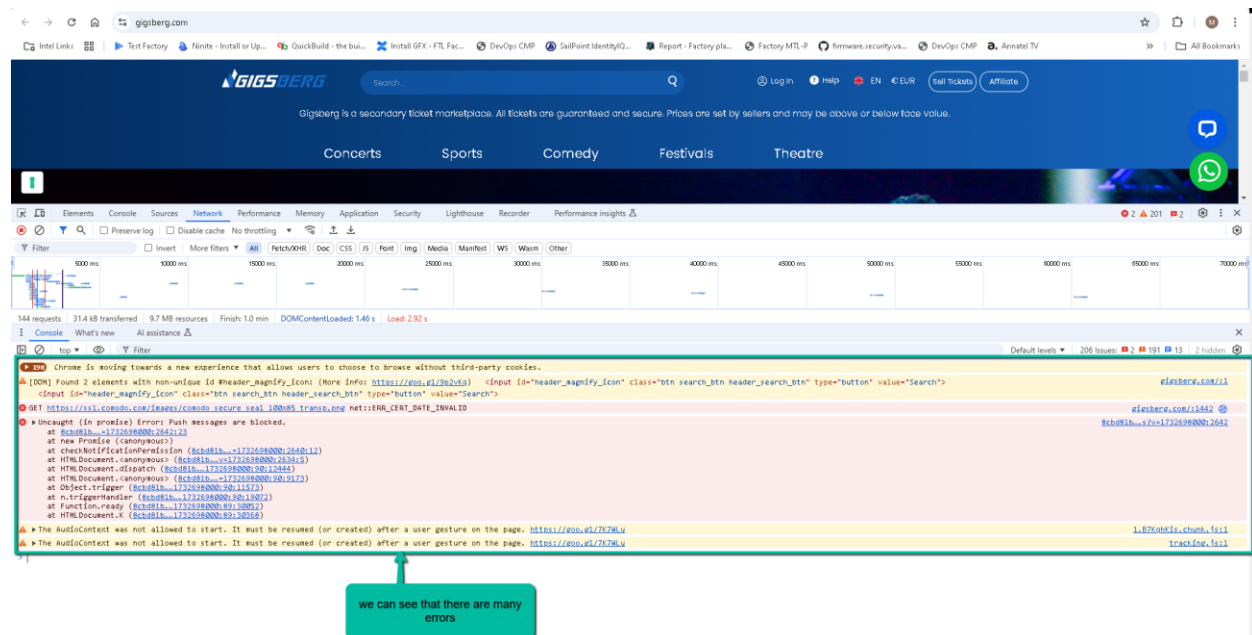

1. Navigate to the homepage URL : <https://gigsberg.com/>
2. Observe the loading speed and ensure no visible errors in the browser console.
3. Verify that all images, text, and buttons are displayed correctly and are aligned.
4. Check responsiveness by resizing the browser window or testing on different screen resolutions.

Expected Result: The homepage loads within 2 seconds, without console errors, and all elements are displayed correctly and aligned.

Actual result: We can see that there are many errors when looking at the browser console

Environment: WIN 11 + GOOGLE CHROME

Attachment:

2. Search Functionality - Valid Inputs

Test Case ID: TC_SEARCH_001

Description: Verify the search functionality with valid inputs.

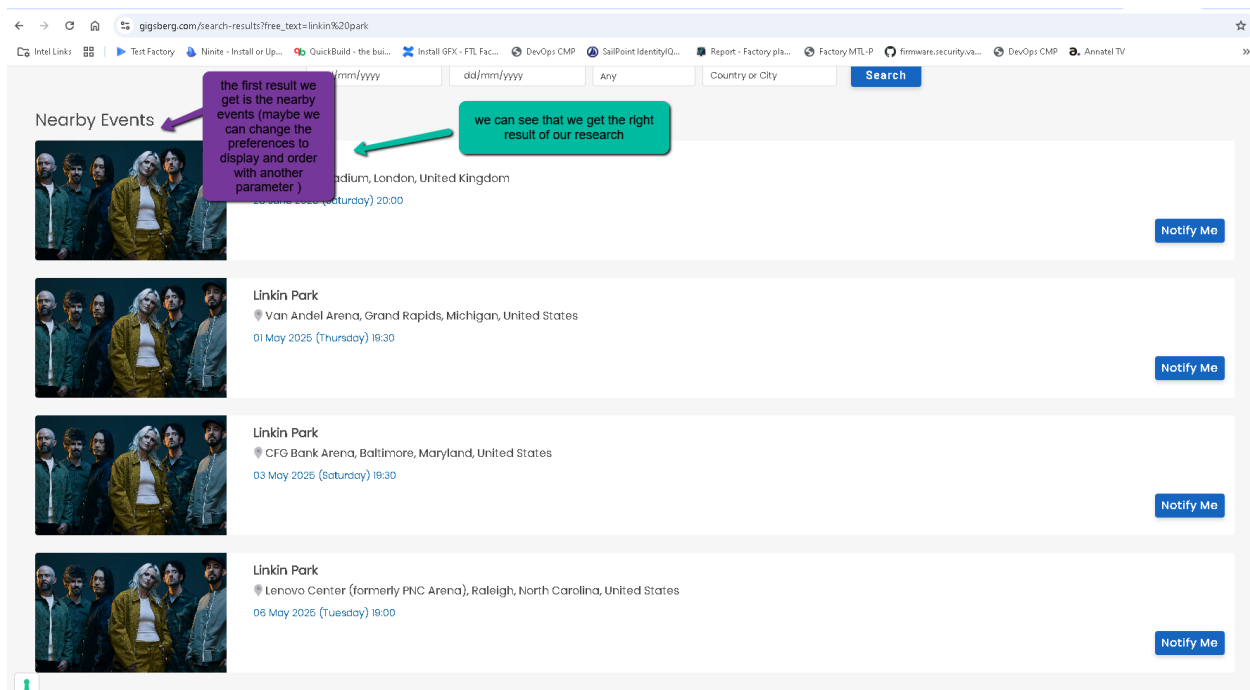

Steps:

1. Navigate to the homepage URL : <https://gigsberg.com/>
2. Enter "Linkin Park" in the search bar.
3. Click on the search icon or press "Enter."
4. Verify the search results display the relevant events, with accurate details such as location, date, and time.

Expected Result: The search results accurately display all "Linkin Park" events, matching the query.

Actual result: We get accurately all “Linkin Park” events and the first result is “Nearby events”.

Attachment:

3. Search Functionality - Invalid Inputs

Test Case ID: TC_SEARCH_002

Description: Verify the behavior of the search functionality with invalid inputs.

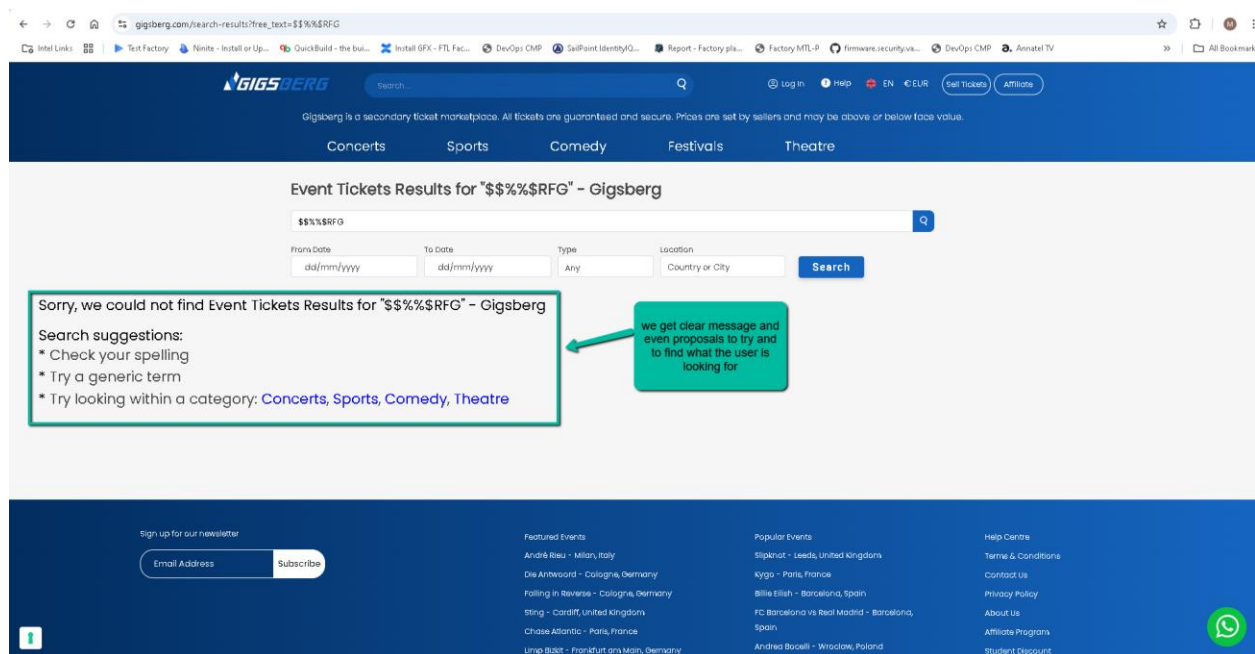

Steps:

1. Navigate to the homepage URL : <https://gigsberg.com/>
2. Enter a random string of characters (e.g., "asdf1234!@#") in the search bar.
3. Click on the search icon or press "Enter."
4. Verify the system displays a user-friendly error message or "No results found."

Expected Result: A user-friendly error message is displayed, such as "No events found for your search query."

Actual result: We get a clear and friendly error message, we even get some advices.

Attachment:

4. Ticket Booking - Valid Flow

Test Case ID: TC_TICKET_001

Description: Verify the ticket booking flow with valid data.

Steps:

1. Navigate to the event details page for "OneRepublic" on 8th December.
2. Click on "Tickets."
3. Select a ticket type and quantity.
4. Proceed to checkout and enter valid payment details.
5. Confirm the booking.

Expected Result: The system successfully books the ticket and displays a confirmation message with booking details.

Note: No actual result as this is a simulation and cannot purchase a ticket with money.

5. Broken Links

Test Case ID: TC_BROKEN_LINKS_001

Description: Verify there are no broken links on the homepage.

Steps:

1. Navigate to the homepage.
2. Click on all hyperlinks (e.g., "Contact Us," "Terms & Conditions").
3. Verify that each link navigates to the correct page without displaying a "404" or similar error.

Expected Result: All hyperlinks navigate to the correct pages without errors.

Actual Result: All the hyperlinks in the homepage are working (we did not try the footer).

6. Mobile Responsiveness

Test Case ID: TC_MOBILE_001

Description: Verify the homepage's responsiveness on mobile devices.

Steps:

1. Open the homepage on various mobile devices or emulators.
2. Test on different screen resolutions (e.g., 360x640, 375x667).
3. Verify that all elements are visible, functional, and aligned correctly.

Expected Result: The homepage is fully responsive, with no layout issues across devices.

Note: No actual result as this is a simulation.

7. Date Picker Validation

Test Case ID: TC_DATEPICKER_001

Description: Verify the behavior of the date picker on the "OneRepublic Tickets" page.

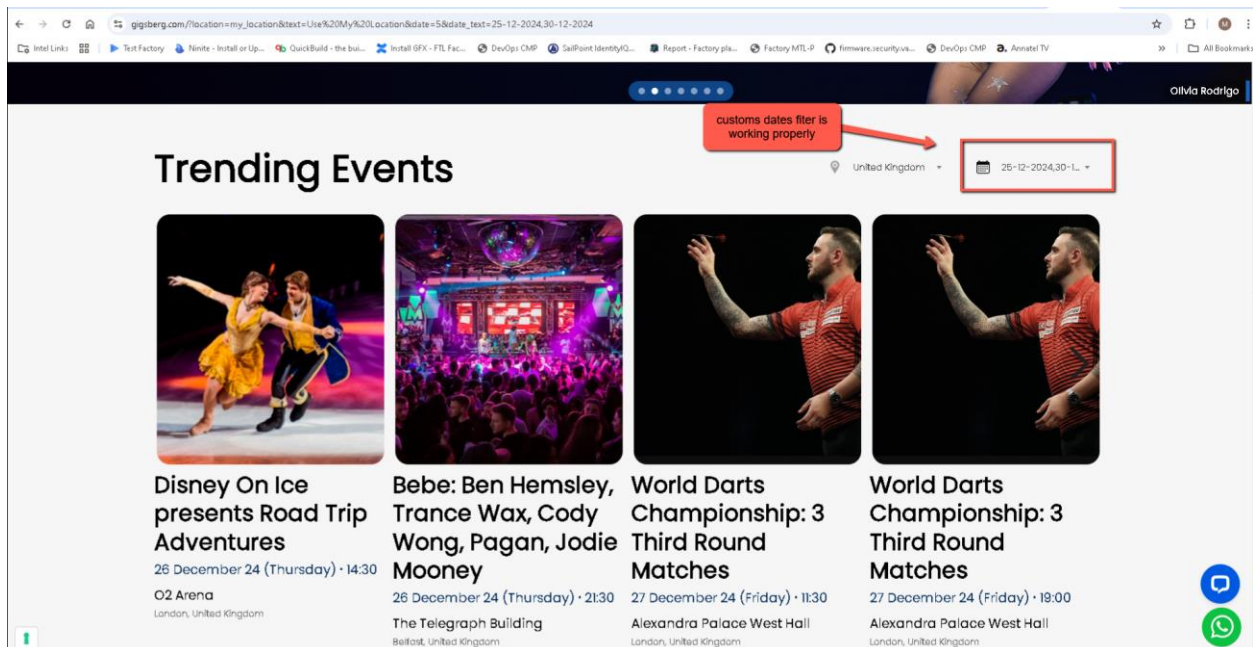

Steps:

1. Navigate to the "OneRepublic Tickets" page.
2. Click on the "From Date" field.
3. Select a date in the past (e.g., 01/01/2023).
4. Verify the system prevents selecting past dates.

Expected Result: The date picker does not allow selecting past dates and displays a user-friendly error message.

Actual result: Custom date button on the homepage is giving the expected result and filter in function of the choosed dates.

Attachment:

8.Test Case: Search Functionality - Handling Minor Input Errors

Test Case ID: TC_SEARCH_003

Title: Verify that the search functionality can handle minor input errors, such as spacing or misspellings, and still provide relevant results.

Objective:

To ensure the search functionality is robust enough to correct or interpret minor user errors (e.g., "One Republic" instead of "OneRepublic") and provide relevant results.

Preconditions:

- The website is live and accessible.
- Events related to "OneRepublic" are available in the system database.

Steps:

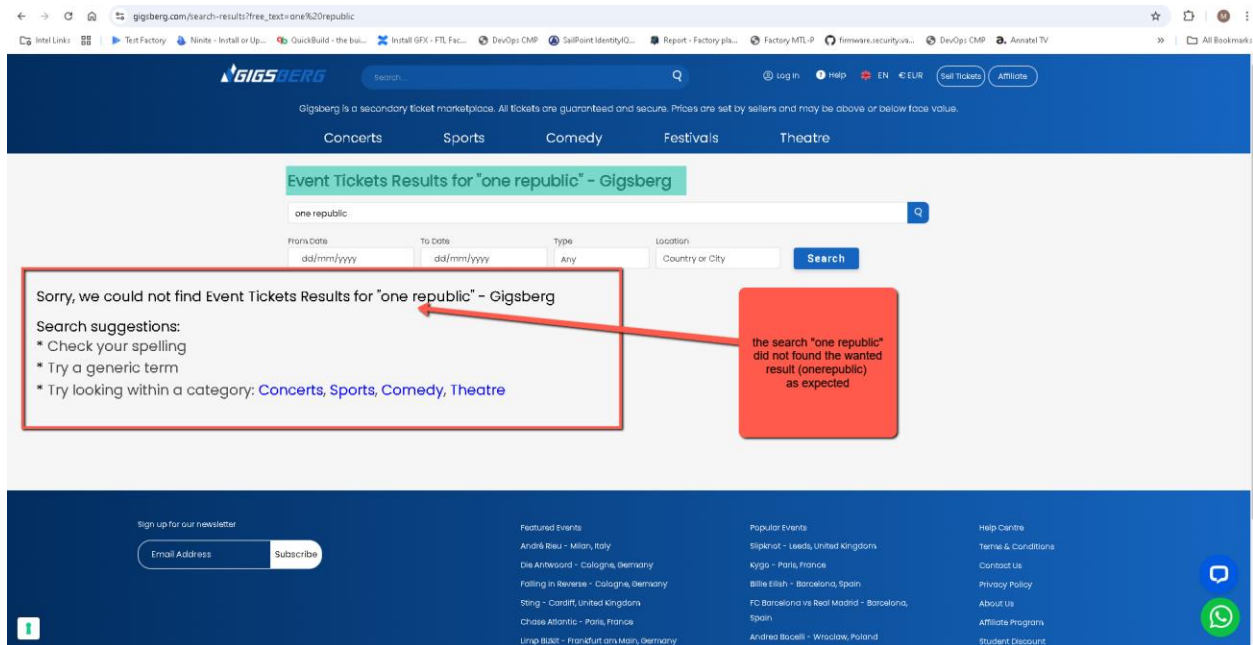

1. Navigate to the homepage of the website URL : <https://gigsberg.com/>
2. Locate the search bar at the top of the page.
3. Enter "One Republic" (with a space) into the search bar.
4. Press "Enter" or click on the search icon to execute the search.
5. Observe the results displayed.

Expected Result:

The search functionality should display all events related to "OneRepublic," interpreting "One Republic" as the intended input.

Actual Result: we get an error message

Attachment:

9. Newsletter Subscription

Test Case ID: TC_NEWSLETTER_001

Description: Verify the newsletter subscription functionality.

Steps:

1. Scroll to the footer of the homepage.
2. Enter a valid email address (e.g., test@example.com) in the subscription field.
3. Click on "Subscribe."
4. Verify the system displays a confirmation message and sends a confirmation email.

Expected Result: The system successfully subscribes the email and sends a confirmation email.

Note: No actual result as this is a simulation.

10. Title: Logo on the checkout page does not redirect to the homepage when clicked.

Test Case ID: TC BUG_UI_001

Description:

On the checkout page, the logo located at the top-left corner is unresponsive when clicked. This prevents users from returning to the homepage during the checkout process, which is inconsistent with the behavior on other pages.

Steps to Reproduce:

1. Navigate to the homepage (<https://staging.example.com>).
2. Add an event ticket to the cart and proceed to the checkout page.
3. Locate the logo at the top-left corner of the checkout page.
4. Click on the logo.

Expected Result:

The logo should be clickable and redirect the user to the homepage (URL : <https://gigsberg.com/>).

Actual Result:

The logo does not react when clicked, and no redirection occurs.

Impact:

- Users are unable to return to the homepage directly from the checkout page, affecting navigation and potentially causing user frustration.
